After the use of this software, you.Q: How to handle transparent gradient PNG icons in CCSprite? Basically, I've been playing with CCSprite and it's already very easy to add images and text. However, what I really need to do is add multiple images, with transparency, on top of one another. To do this, I was going to add a CGRect to the top layer, use it to create an image, then add it as a child to the first layer. While this would work, I need to create two image files, which seems rather messy. Am I missing a simple and proper way to do this? A: If you want them separate but superimposed, use a CALayer with a CImageRef, using something like this: // Preferably in a subclass: - (void) initWithImage:(UIImage *)image size:(CGSize)size position:(CGPoint)position { self.contentMode = [[UIScreen mainScreen] scale]; self.layer.contentsScale = [[UIScreen mainScreen] scale]; if (image != nil) { self.image = [UIImage imageWithCImage:CImageCreate(CImageGetWidth(image.CGImage), CImageGetHeight(image.CGImage), kCGImageAlphaNone, 79a2804d6b
