This tool is the key to modify the color palette of an image. In addition to all this, there are other tools that differ from the Make Adjustments Tool and are based on different concepts. Some of them are Color Correct, Distortion, Eraser and other editing tools. The gradient tools are one of the most valuable sets of tools in Photoshop. Gradient maps are the tools that allow you to build various shapes and patterns of gradients. Gradient maps can be used to create the correct blend between two shades.
