As of AutoCAD 2014, features such as scripting and plugins are available in the free AutoCAD LT, as well as a separate application suite for the professional version of AutoCAD called AutoCAD LT for Professional. Fingerprint recognition Since version 2007, AutoCAD includes a digital fingerprint that records a unique pattern of microscopic bumps on its surfaces. When AutoCAD is started, it will record the fingerprint and look for a pre-defined pattern to identify the user's computer. If this fingerprint does not match the one stored on the user's computer, AutoCAD will ask the user to sign in. History AutoCAD was first released for MS-DOS on March 23,
