Elden Ring Features Key:

Action RPG & Character Building In addition to typical RPG gameplay, this title offers a unique action element that allows you to learn or master more weapons and magic, while improving your character's skills. Also, your character can switch quickly to any skill you learn, and your character and battle form will be highly customizable, allowing you to create a unique character that your heart desires. The game also supports multiple local multiplayer modes, and a custom buddy system is also included.

New Dungeons The game has newly designed dungeons that appear in one of the three regions of the world, Tarnished. These dungeons will challenge even the most powerful players as they destroy the power of the Gates, and the different design concepts of these dungeons allow players of various styles of play to have an enjoyable experience through all stages.

Fantastic PVP Action The enemy AI design in the Dungeons is both transparent and realistic, and the PVP battles are full of dramatic back-and-forth fights. No matter how large a party you form, your allies will support you in battle, and this creates an intense, heart-racing PVP experience and a fun atmosphere.

Run with a Sanity From creating a character to diving into the heart of the battle and maintaining a high level of alertness through the event items you're using, there are many exhausting activities you must do in order to get the most out of the battle system.

Here are tips to help ensure the best gameplay possible while playing.

How will I play?

- Due to the game's support of Up to four-player online play in different combinations, it is recommended that you log in no longer than 30 minutes to an hour per day, and log in no more than one hour per day if you're a new player.
- Make sure your Day and Night setting is set so that you can best see the game's world and find Adventure Points.
- While the game doesn't adopt a turn-based battle system or a traditional loop of random encounters, the pace of battle doesn't slow, so do your best to prepare yourself for battle.

① **BOWING DOWN TO VULGAR** You prepare to take a good fight... The game world is a dangerous place. You must learn to bow down to the vulgar person in order to survive. Through special rules implemented into the game, there are fights that occur not just between enemies, but between various characters within the same party. If you find yourself exhausted by the battle, you will automatically enter a period of time where the battle will automatically slow down. However, if you manage to take down an enemy, you will be rewarded with increased EXP.

② **PLAY TO YOUR STRENGTHS** You can develop your character in a variety of ways. For example, you can increase your strength in order to become a powerful warrior. Or, through leveling up, you can craft magic that allows you to perform powerful attacks. You can equip various equipment and weapons to achieve a more powerful look.

③ **HOW TO CLOSE THOSE ENCOUNTER ROADS** You can travel from one location to another and are able to freely roam. You can freely go to areas that other characters cannot reach. However, these areas can only be accessed while you are engaged in battles. After all battles, you will return to the main battlefield where you are able to access the restricted areas once again. In order to access an area you were able to access before, you must first visit a nearby location, and then open the gate. You will be able to access only the restricted areas that you were able to access last.

④ **THE BEST FOR YOU** You can freely switch the main weapon and skill to the weapons and skills that are best suited to your battle style. This is how you can customize the best weapon and skill.
