FIFA is the world's leading sports video game franchise. For more than a decade, FIFA has been the most authentic sports game on the planet. With FIFA Football, the perfect

balance is struck between creative control of players and teams and football realism. What is football? FootBALL is the world's favorite sport. Made up of players, teams and fans, it's a sport with stunning beauty and unbelievable skill. Football is played on a football pitch (or two), with players using their bare feet to run, pass, shoot or defend the ball. What is FUT? FUT (Franchise Ultimate Team) is the centerpiece of FIFA. Only through FUT can players build a team of real football legends through a limited-time gameplay experience. FUT is also where they can play and compete with their friends in the all-new Club World Cup. Why did FIFA change its name from "EA SPORTS FIFA" to "FIFA" in 2017? In 2017, EA SPORTS revamped its game's brand, dropping the "EA" part of the FIFA name. Why don't I see real-life leagues in the game? We don't want to add leagues or clubs that don't

exist or aren't in FIFA! We want the game to be as authentic as possible. Why can I not play in a game I made? We don't sell our FIFA players' accounts. How do I select my country for FIFA? You can change the game's language and UI to your own language, and you can get FIFA in more than 200 countries and regions from the in-game store. What mode do I have to play to level up with skill? You have to play to level up with Skill. You'll be able to play FUT matches and play with up to five friends at the same time. Is the game better when I have the real-life teams? The FIFA 20 engine already has over 500 physics-based animations. It's better now than ever before. What content can I unlock in FIFA when I have the real-life teams? When you have the real-life teams, your game's overall difficulty will decrease and you'll gain achievements for completing certain tasks. What are the game

restrictions? You can't be loaned to a different club for free and you can't purchase items in-game
