Aven Colony is an action, space trading, turn-based strategy game set in a vast procedurally-generated cosmos. Play with up to four friends over local network, drop in and out on a mission, share your replays via the Steam Workshop, and take on the challenges of a campaign. Spectator Mode: Aven Colony gives you a choice of ways to view the action - you can play as an observer, or "guide" the action yourself from a saved game. As an observer, you get 360° view of the battlefield and all live actions taking place at your screen. You can choose from a selection of camera angles, and there are even some nice animated transitions from one view to another. You can click on any of the units on the map to give them orders, highlight friendly units, and zoom in or out to focus on smaller units or larger maps. Guide View offers a similar experience, but with a much more limited interface. You can give up to four friends a tour through the game world, and can take control of all the units in the game during your playthrough. Local Co-Op: Aven Colony supports 1-4 player local co-op with drop-in and out play. It's just as simple as playing the single-player game, except that you can take turns with any of your friends and they can also take turns with you. Multiplayer Steamworks: Play with up to 4 players on the same PC. Learn how to play together through the in-game help, or read the extensive multiplayer FAQ, which is a resource at the heart of any game, and updated every time new features are added. Aven Colony has a robust steamworks system for clan support, so you can join a group or make your own group. Multiplayer Matchmaking: Multiplayer can be setup to automatically pair up opposing teams, or people can find and form a group of their own. Steam Cloud: Aven Colony now supports the Steam Cloud, which means that achievements and unlocks are synchronized across all users and their computers, no matter which one played it on. This allows for a richer way to enjoy your games and achievements and is available to users who own all of the following games: Aven Colony Diablo III - Reaper of Souls Life is Strange Borderlands: The Pre-Sequel Anno 1800 Steam Achievements: Aven Colony has steam c9d1549cdd

The board game is a winner of many awards including Mensa Select, "Popular Science: Best of 2011 Toy Fair", and was a Toy Association "Toy of the Year Finalist". The game is set in the Egypt of ancient times, where the Pharaoh's pyramid is about to be built. Each turn the player moves a light-green shooting piece with a fire beam on it. To fire the player must do a balancing act with the piece to get it into position, as the next player's shooting piece must be hitting the first piece. The aim of the game is to be the first to arrive at the pyramid, in a pyramid building order from closest to furthest. The game has five different difficulty levels which the player can select in single-player mode, as well as three game-play modes to choose from: Competitive, Solo, and Training. The game supports Steambot, Steam Big Picture and Steam Controller. The game is perfect for those who love playing board games and want to show off their gaming skills! Three difficulties, from easy to hard: Easy Normal Hard. The first player to be hit by a stone is the loser! Just like that. How to Play Solo: Just start the game, and go through the tutorial! Competitive: Start playing the game - no tutorial needed! "Teachers out there - can you help?" Train for a competition - are you ready? Buy It Once, Play It On Linux. Included in the game is a version of the game for Linux. About the Developers: Laser Games is a small, independent game development studio with a focus on puzzles, with the aim of developing best-selling games for platform and even mobile smartphones. The company's first project was The Secret of Monkey Island, which was the best-selling computer game of 1994. In 1995 Lasers produced CD-ROM versions of The Secret of Monkey Island, Grim Fandango, The Dig and Day of the Tentacle. The next year Lasers released in succession Day of the Tentacle, The Dig, Sam & Max Hit The Road and Braid. In 1997 Lasers Games released Space Quest 3, its first multiplayer game, the award-winning The Games for Windows port of The Dig,
