Key features: Supports multiple documents Portable version Supports multiple tabs Languages available Uses the standard Notepad files as templates The latest news from the developer In today's software marketplace, you can find almost any type of software program. Some are specific, some are specialized, and some are even unique. While those that offer a particular set of capabilities are often simple to use and make the job you do a lot easier, there are also those that are quite complex, yet easy to use. Portable Notepad Enhanced is one of those rare software programs that have a simple name but a powerful set of features. Being portable means that you can take the program on the go, use it on any device and then simply remove it from the device when you have finished. While it might look like just another notepad application, Portable Notepad Enhanced has a lot going on. It is a full-fledged word processing program that can be used to write and edit plain text documents as well as HTML and XML documents. The program also has support for tabs and regular expression searches. We have tested the program in a number of different operating systems and on a number of different computers. While we have yet to detect any bugs or errors in our tests, there is some rare software that just doesn't function well in one or more of these environments. You can download Portable Notepad Enhanced for free from the developer's site. FILED
