Portal vein thrombosis (PVT) is an uncommon but severe complication of Roux-en-Y gastric bypass (RYGBP). We report two cases of massive PVT complicating RYGBP after a gastrojejunostomy leak. The first patient underwent a laparoscopic RYGBP; and the second a hand-assisted laparoscopic RYGBP. Both patients were submitted to open repair of the leak and pulmonary thromboembolism prophylaxis with low molecular weight heparin. An extensive PubMed literature search was performed, and literature reports are summarized. We performed a PubMed search using the key words "portal vein thrombosis" and "Roux-en-Y gastric bypass" to identify publications reporting PVT after RYGBP. A total of 99

articles were found in the final PubMed search. We identified 15 cases of PVT after RYGBP and reported 5b5f913d15
