
Download Superbike 2001 PC Game Full Version High Quality

my favorite part of the game, is the split screen. we have a duel, with you riding your own bike, and your opponent riding his own bike. so if you like to drive against each other, you can do so. the game is pretty much free from bugs, and is in english. it's a very well-made game, and it really seems to be the official game of the world superbike championship. in my opinion, the game is worth buying, but if you're really on a budget, i'd suggest buying it for \$19.99, because it's only \$20 more, and you get a lot more. the game is available via steam. if you don't own a copy of the game yet, i'd suggest buying it now, because you can buy the game on sale, and get a better deal. it's also worth noting that the price for the game decreases every year. there are a number of reasons we've come to expect certain elements from ea's bike games, and the first is difficulty. other racing games employ aids to make the experience more enjoyable, but ea is completely unapologetic in its determination to make the game as realistic as possible. this inevitably means that the experience is much more difficult than it should be. for example, if you crash into a wall, the bike will be completely flipped over and you'll be dumped into the air. if you do this twice in a row, you're out of the game. if you crash on a corner, you'll be launched forward. if you go off track, you're thrown out of the game. as we've already mentioned, racing games are notoriously difficult, and we've come to expect a certain level of help from the makers of bike games. unfortunately, ea have gone and spoiled it, there's no on-board track following option, and even the most forgiving mode is beyond the skills of most of us. things like braking and cornering assist are on by default, and you're hit with the dead-man's curve. this means you can't do much worse than the ai, and it's not even an amusingly realistic ai. the only way you'll get a decent time is by using the sluggish and highly unresponsive assists.
