SEO MACHINE LITE Download [Mac/Win] Latest

Simple and modern graphical interface The application doesn't have a setup and it installs quite quickly on your computer. It doesn't have any customization options, but you wouldn't really need them. You can find detailed documentation about the program on the developer's website. Before you can use the application, you will need to register with an account on the developer's website and get a registration code from there. The trial version lasts for two months, plenty of time to get a general idea on what the application can do, before you purchase it. Check multiple pages and perform tasks easily It comes with 8 modules that you can choose from, including DoFollow Checker, Keyword Competition Checker, Link Extractor, Link Status Checker, Outbound Checker, Proxy Scraper, Proxy Checker and Keyword Suggestion Scraper. It also has some complementary modules, like Proxy Settings, Proxy Log and Activity Log. DoFollow Checker allows you to check a page is do-follow or not. Besides that, it can check if there is any comment box on the page, if the box is public or private, and what blog engine is behind a page. Check the levels of competition of keywords Keyword Competition Checker is for checking the levels of competition of a list of given keywords. The module checks the number of search results returned from the "allintitle" and "exact" search operations. You can also extract links from a list of pages, check the status of a given list of links and get reports of detailed error codes of links. You can count the number of external and internal links of a list of pages. All in all, SEO MACHINE LITE is a very useful application that allows SEOs to check multiple web pages and perform various tasks. SEO MACHINE LITE (Mac OS) Screenshot: SEO MACHINE LITE (Windows) Screenshot: SEO MACHINE LITE (Linux) Screenshot: SEO MACHINE LITE (Linux) It allows you to work in a much easier and fluent way. Simple and modern graphical interface The application doesn't have a setup and it installs quite quickly on your computer. It doesn't have any customization options, but you wouldn't really need them. You can find detailed documentation about the program on the developer's website.
