[Screenshots](--- ** Copenhagen is not a static application. It is designed to work in any type of infrastructure or development environment. But, it is more than a simple design tool. It is a collaborative work management tool that will enable you to become your own best team member. To gain control over your work, you must be comfortable with what you are working on. With Copenhagen, we are not trying to be 'better than google docs' (even though we are amazing at what we do!). Rather, we are trying to provide you with a unique set of tools to take control of your thoughts, actions and productivity.** ** Copenhagen is a product and an ecosystem. We've built a series of add-ons that could be anything from a collaboration space, a to-do list, a gallery or even a remote assistance tool. The simplicity of the interface means you can use Copenhagen as the simplest and most effective tool for your team.**
