I know there's a lot of skepticism about Adobe Photoshop for mobile, skeptical that the software is really up to the task of graphic design, but Adobe's marketing seems to have sunk the company's reputation. See for yourself, Superintendent: One of the strengths of the newest version of Photoshop is that it manages to be both powerful and user-friendly at the same time. The text-editing tools are extremely fast, and the visual ones may be accurate, but they don't always offer you every possible choice. The app spares you that aggravation.
