Ref Audio continues to be the favorite audio software on PCMag.com for gathering or editing sound and audio, but Sound Forge continues to show up as a top download every month. It let me fix and shape professional-sounding audio clips without the need for multitrack audio editing. We use it to handle all of our client's audio. In January 2017, I reviewed Elements 14 and the updated Adobe Director CC 2017 is a notable upgrade to the venerable Media Encoder. The new release offers more control over workflows and displays video and audio dialogs in a more readable way. Designers and artists are a patient bunch. They resist change, wondering if they'll have to relearn the skills they've mastered over the decades. But then they finally capitulate and embrace the inevitable, in the hope that digital technology will bring great benefits to their craft. It did for Chris Gantz, who now works for Adobe as an instructional designer for Photoshop. Ever dreamt about creating your own animation? In this interactive, inviting interface, you can animate even complex concepts in real-time. It's called Adobe Inspire, and it has a lot to offer - including the ability to use Photoshop and other Creative Suite plug-ins as you create with its live streaming tool. H&A Creative has introduced several new services to Adobe's Creative Cloud in 2017, including content creation, editing and collaboration, and a good amount of mobile apps. In all of them, the company wants you to take advantage of the wealth of tools within the Creative Cloud. H&A chose to use this title when referring to the Creative Cloud because it also includes the Design Premium subscription where you can buy four separate (but still free) subscriptions to Photoshop, InDesign, Lightroom and Photoshop Mobile.

Adobe also introduced several new tools in Photoshop to help photographers make stylized images that are easier to manipulate. For example, the Darken Color and Lighten Color tools allow you to adjust contrast richly and easily in your photo. These new features are all released as part of today's announcements at Adobes MAX in Los Angeles, which included a record number of educational sessions and announcement of a new Core-D curriculum from college instructors including a graduate course of studies. As a part of Adobe MAX this year, MaxMind will present the Global Top Lookups report at the company's headquarters in Orem, Utah, counting more than 34 million IP addresses. Attendees will learn how Adobe technology has become a critical component of MaxMind's growth, including specifically how our HTML5 Geolocation technologies are used by companies ranging from places like Rometrics and Haris to ICAL , a company that everyone needs to know. "Every day, thousands of new apps and websites harness our Geolocation technologies and we're excited to partner with MaxMind to show how many of them are already using MaxMind location data to help organizations target their users, gain customer insights and improve their online marketing," said Omri Bar-Zeev, CEO, MaxMind. "Adobe continues to fuel progressive innovation in the digital space, making Photoshop as sophisticated as ever before. Now, we're taking on the challenge to make the way that users collaborate on projects even more powerful and simpler," said Casey Newton, senior vice president and general manager, Adobe Photoshop. "We've let the next generation of creators take charge of the way they work by empowering them with a range of new tools that make it easier than ever to collaborate and share ideas."

Also comes the Key Promo Version system where photographers can get a discount for a new 1to1 Camera to Canvas option at 35% with Activation Discount for 12 months. Customer support for historical versions is also made available and these are ideal for those beginning their journey with the software. The new Spot Healing Brush Mixer feature lets you blend and darken the spots in your image using your selection settings. What's more, you can open the corresponding masks for more precise corrections. The new Paint Bucket tool is just like the regular Paint Bucket, but it's easier to make selections on just about any object—like a person or a creature, really. You can also use the Brush button to paint with it. And if you don't want to paint with it, you can choose the Soften tool and just paint around areas that need to be softened. If you click the eyedropper icon in the toolbar, you'll get an exclamation point, which means you can directly pick any color you want to paint. But it's also used to get a point in the background, which has its own color as well. Adobe's new manual selection tool is "more like" the marquee tool. It lets you drag both magnetic and non-magnetic (brushes) selections around images after you make a selection. This lets you adjust the position of items in your picture. Not the most convenient option but it's still pretty great. For designers and photographers, Photoshop is, and will always be, one of the most important, and used, applications to have on their desktop. The next version of the popular photo and graphics editing tool will, finally, leverage GPU rendering improved by more than a decade of development, and deliver one of the fastest, most robust image and video editing tools in our industry.
