health remain poorly described. This article reports the findings of a descriptive study comparing nurses' health during active and reserve duty. The findings indicate that the rate of work-related health problems was greater during active duty than during reserve duty. The most frequent problems were neck and back strains, lower-extremity sprains and strains, and fatigue, which was reported by more nurses during active duty.

Q: C++ replacing if condition inside of another if I have main if condition inside of other if condition. And I want to replace it with single if condition. Here is my code: `if (m_state == m_eState) { // some code } if (m_state == SD_ENABLE_ENABLE || m_state == SD_ERROR_STOP || m_state == SD_ERROR_POWERON) { // some code }` How can I do this? A: The usual solution to this is to always take the more general case and then specialise it: `template void my_if(State1 a, State2 b) { if (a == b) { // base case`
