
Sims 4 Put Up For Adoption Mod _HOT_

January 13, 2019 - There is actually a little known/hidden option in MCCC that allows you to give a child up for adoption. You press the cradle and ... voila. As a result, you can choose a name (a name from your list), date of birth, height, weight, gender, nationality, religion, gender of the father for a boy, gender of the mother for a girl. You can also choose the type of future father and the type of future mother, for example, if you choose "mother", then you can choose "to give birth" and "not to become pregnant". As you can see, these are not just "parents", but also "children". You can select "edit/add" in the "parents" option, as well as "parents selected for the child".

Sims 4 Put Up For Adoption Mod
