The game was made on a shared platform between ebi-hime and SillySelly. Incorporating the feedback that we got from players, such as "There is no reason to read that game that you've made", "Should we change the art style?", and "Its special effects aren't that great" along with yuzuki's art expertise, this version was reborn as Windswept Night. Loss? We understand that some people who have played Windswept Night before this version might be worried about some of the changes. However, please note that even though the version you're reading this now doesn't have the sex scenes, that doesn't mean there won't be any in Windswept Night. We hope you enjoy reading this version. Steal Me, Steal Me Not Don't hesitate to send us your feedback. If you have any questions or suggestions, you can contact us on Twitter. Why do you need to access my profile? I'm using Python 3.6 to accomplish this. I've had no luck though since I'm fairly new to web pages. When I try to use Python's beautifulsoup to scrape the list of items from the page, the page doesn't reload with the new contents. I'm also not sure if it's an issue with my HTML or Python syntax. My code: from __future__ import division from bs4 import BeautifulSoup import urllib.request import lxml.html url = '
