For those who must use Windows XP, it's hard to beat the Photoshop features and performance on that platform. However, if your plan is to buy a new computer, the situation changes. OS vendors like Apple, Sony, and Microsoft generally prefer to move their own fresh applications to their own latest versions, and to charge extra for upgrades. It's quite possible that when Windows 8 hits your store, it may cost you extra for a license to Windows XP. So, while it's an excellent operating system, you'll need to be prepared to pay more than the cost of making the switch.
