It is only as strong as the last game, but it is also important to note that the end goal is to keep players healthy. Once the next post-season rolls around, teams will be racing each other to get their hands on quality players so that they can turn them into future stars. The draft is coming soon Many of the scouts have already returned to their home countries, but there is still time to complete the draft on March 5. The time that you can select your team is for the "Unprotected" draft. This means that if you don't see your name on the protected list, you can select players. The list will be available here at Frozen Tundra the evening of the draft. Drafts will be held at 10:00pm EST, and all will be completed before the midnight deadline. That means that all players selected are bound to the team that drafted them until the offseason begins. Drafting is a fun way to spend an evening, and it can also help your team out in the long run. If you are struggling on defense, you can focus on drafting help for the backend. If you need an offensive spark, you can spend your energy on drafting someone that you can build your offense around. If you want to push to the playoffs, then you can pick up a handful of

Musician is a standalone Java application that can be run from within your own Java applications and applications such as Eclipse. Musician provides a score layout, a MIDI sequencer, an audio recorder, and an editor for the MIDI sequences created by the sequencer. Musician can export MIDI sequences as a playlist that can be played on a MIDI capable pianola. Currently the score editor is a rather primitive WYSIWYG editor which helps you in the construction of your music. Musician has many advanced features but is designed to be easy to use.
