FIFA delivers the most authentic soccer video game experience that incorporates over 50 officially licensed teams, 16 official competitions, all-new gameplay elements and innovative features that accurately portray players, teams, and stadiums. FIFA delivers an unparalleled depth of gameplay, with a comprehensive career mode, variety of seasons and tournaments, and the most comprehensive set of in-game tools to manage your club. EA SPORTS FIFA represents the next generation of video games. It creates a new visual style while delivering many new features, including changes to ball physics and collision. FIFA on the Move FIFA on the Move™ - The Realst Soccer Experience FIFA on the Move™ delivers a deeper, more realistic football experience. The engine that powers FIFA has been rebuilt to deliver a completely new ball physics system, immersive player movements, and visual fidelity unprecedented in the sports genre. Players feel life-like and the ball reacts realistically – whether you’re playing online, on your TV, or on the Xbox One, PlayStation®4, or PC. The debut of the technology carries on with the introduction of a new way of defending and a faster and more reactive game. For the first time, every goal is contextual: more defensive blocks and last-ditch tackles result in shots being saved, shots being blocked, and passes being blocked. The result? Goals are more often saved, blocked, or deflected. If you prefer, you can buy new shorts, socks, and gloves to help improve your defensive and offensive game. FIFA on the Move™ also makes a major impact on gameplay by evolving the shooting mechanics. It introduces a new shooting mechanic inspired by real life, which makes headers and set pieces the most effective way to strike the ball. Players learn to time their moves and adjust their run-up with on-field actions, allowing them to attack the ball more accurately and with less waste. FIFA on the Move™ introduces two new goalkeeper attributes to enhance realistic play. A quick trigger can be assigned to the right stick to more accurately react to shots and block them. Even more, the new AI will often maintain positioning to block a shot before even moving into a defensive position. A new "Block Sense" system
